WHERE IDEAS TURN INTO IMPACT ENSURE - 2027

Waste is no longer just a problem—it's an opportunity. ENSURE–2027 brings together innovators, industry leaders, researchers, and changemakers to explore smarter ways of managing resources and building a sustainable future.

Now in its 5th edition, the conference creates a dynamic space where connections lead to collaboration, ideas transform into real-world solutions, and innovation drives impact. From emerging technologies to practical strategies, ENSURE–2027 bridges the gap between research and implementation.

At ENSURE–2027, conversations go beyond presentations—they evolve into partnerships, prototypes, and practical solutions. It is a space where diverse perspectives converge to challenge conventional thinking and reimagine how we approach sustainability. By bringing together forward-thinking minds, the conference encourages bold ideas, cross-sector collaboration, and a shared commitment to creating measurable impact. Every interaction is an opportunity to rethink, redesign, and redefine the future of resource management.

Be part of the conversations that matter and the solutions that shape tomorrow. Connect, collaborate, and contribute to a more sustainable world.

Who will you meet?

Join your fellow changemakers from Academia and Industry for an exchange of new ideas to accelerate the transition to sustainability.

The program brings together key stakeholders to share knowledge, discuss trends in policy, research and industry.

Attendees will Include:

Scientists
Researchers
PhD Candidates
Industrialists
Technologists
Local government agencies
Management authorities

Special Features

- Plenary Session
- Oral Presentation
- Panel discussions
- Interactive poster session
- Networking Breaks
- Cross-disciplines Collaborations

Registration

All participants, except non-attending co-authors, must pay the appropriate registration fee.

Sponsorship Guide

Support the event and take the advantage of getting connected with your target audience!

The United Scientific Group (USG) organizes interdisciplinary International conferences to show case on cutting-edge basic and applied research outcomes within engineering, life sciences including chemistry and other diverse role of science and technology in society.

Environmental Sustainability through Waste and Recycling (ENSURE-2027) three-day conference will give attendees a chance to interact, learn, and engage with the business industry's foremost researchers, while tackling the pressing issues that face the new generation. Participants will be top level representatives from sectors like prominent commercial; regulatory; scientific organizations and academic institutes.

USG offers several opportunities for sponsors to demonstrate their support towards science and its people by providing financial contributions to facilitate the presentations of noble research findings, and other necessary management for the scientific gathering.
